

City Clash

Cityclash is a strategic browser idle game deployed in block-chain. players can own villages and upgrade villages using resources in game (Gold , Elixir and Gems). Gem is a token based on ERC20 protocol. upgrade village building and raise powerful troops with resources gained from attacking other players. users can also sell their village for earning ether.

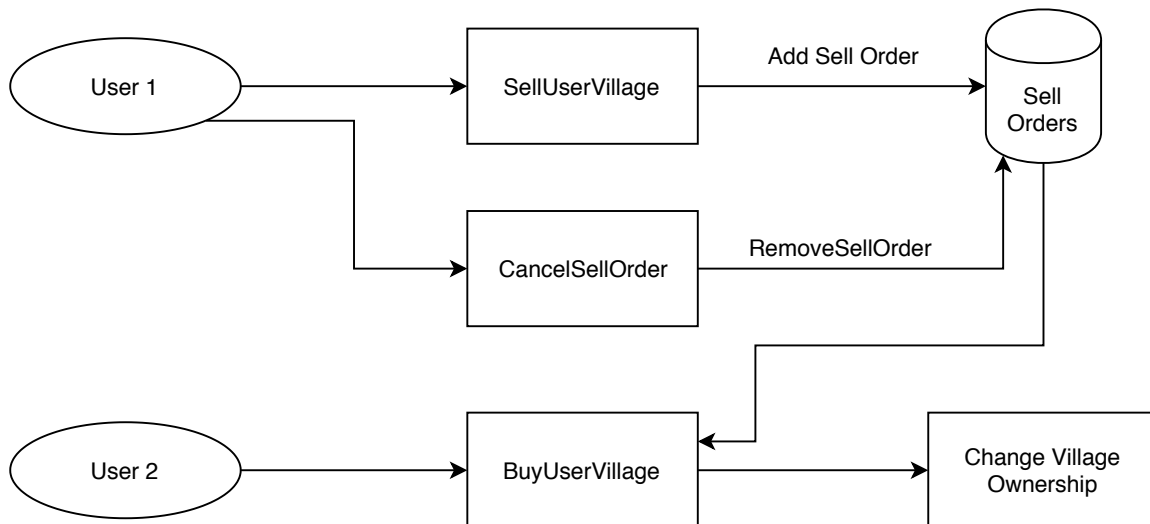

Admin can add / change / delete troops and buildings . admin can also change town basic price (in Gems) and sell commission values.
